

Get Everyone Involved in Small Meeting Rooms
AVerMedia Wide-angle 4K Webcam PW515 with AI Speakerphone AS311

Challenges

- Having poor audio and video quality in a conference room.
- Whether everyone in an online meeting is seen and heard their best by remote participants.
- Interruption occurs whenever you need to manually adjust the camera framing.
- Online privacy and security concerns.

Solutions

- Deliver crystal-clear audio and premium 4K video experiences.
- AI Framing: with just a simple gesture to keep participants effortlessly in the shot and focus. No more framing by hand or remote, or unwanted distractions during meetings.
- The ease of use and affordability, allow nearly any organization to equip its small rooms with vibrant video and audio so every participant can be seen and heard properly to achieve **Meeting Equality**.
- Easily connect to any video conferencing platform or virtual meeting software.

Build High-Performing Collaboration Workplaces
