Refresh-Rate

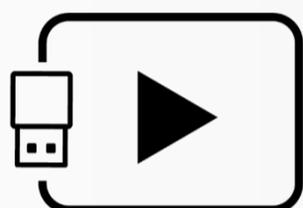

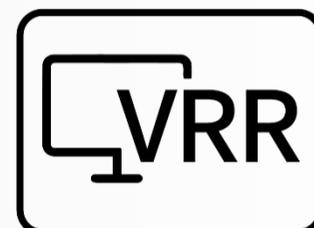

The new generation Live Gamer EXTREME brings familiar ease of use and user centric design with improved performance to the mainstream customer. The newly added capabilities of HDR pass-through, Variable Refresh Rate (VRR) and plug and play support along with the high quality 4K30p capture brings what were considered best in class features to the mainstream at an affordable price.

Key Features

Capture your gameplay in high detail with the support of up to 4Kp30 on a 4K 60Hz HDR monitor. If fast is your pace, switch to QHD and play at up to 120Hz while recording at FHDp60. Thanks to the uncompressed capture capabilities, your gameplay will be captured exactly the way it is meant to be.

The brand-new Live Gamer EXTREME 3 supports VRR to give you tear-free and stutter-free gameplay with supported monitors. (up to 1440p120 pass-through)

Simply plug in your Live Gamer EXTREME 3 along with HDMI and it is ready to stream. It is a simple and easy to use capture solution.

Level up your stream and multistream to Twitch, YouTube, Facebook and many other platforms simultaneously with AVerMedia RECentral.

eco
environment
friendly

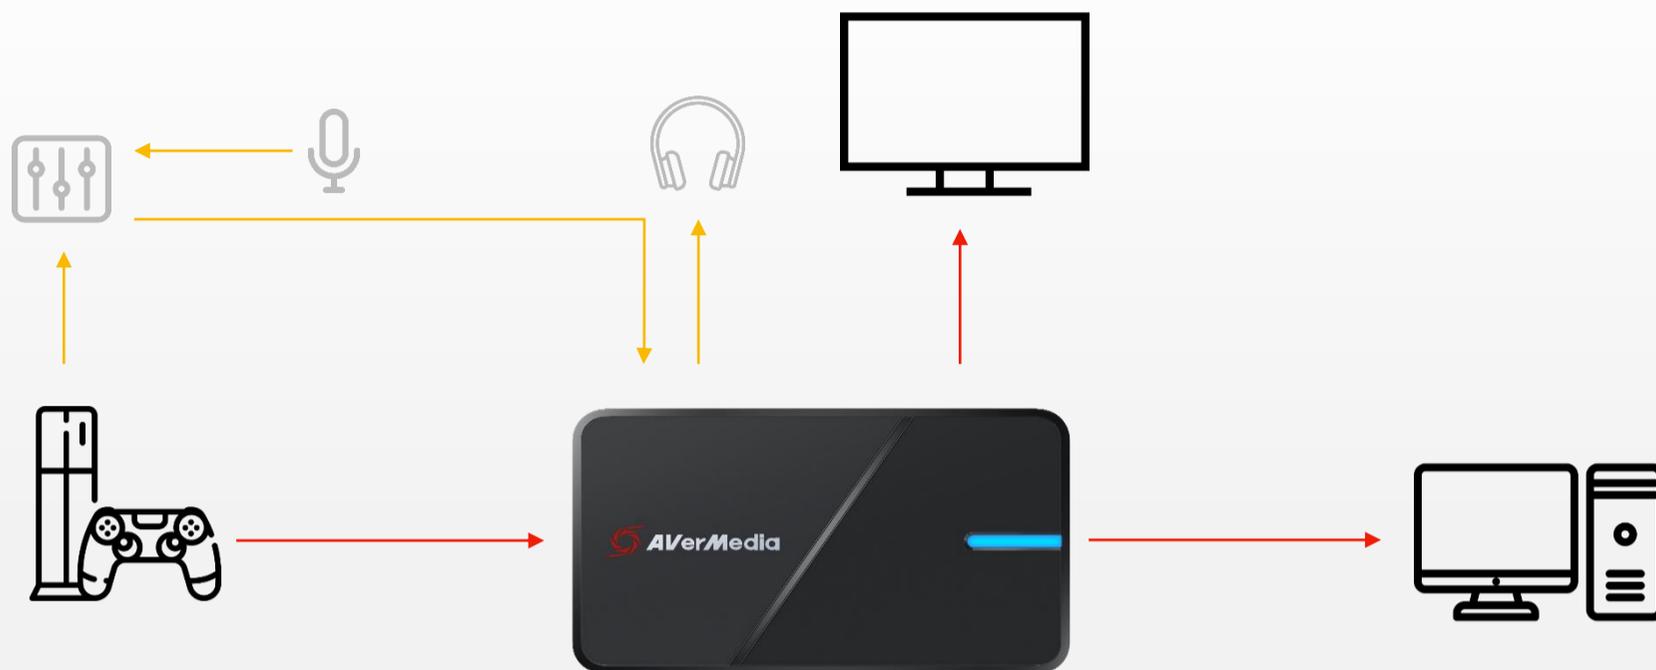

We believe that saving the environment we live in is a responsibility of everyone. That is why AVerMedia follows strict ESG guidelines when creating The Live Gamer EXTREME 3 to minimize carbon emission and waste creation.

With nearly zero latency on the pass-through signal, and ultra low latency through to the streaming signal, the Live Gamer Extreme 3 makes sure both your gameplay and stream are smooth and lag-free.

Thanks to the built in Line-In and Line-Out connection, it is a breeze to re-route your audio into a mixer or mix in different audio outputs into the stream source.
